

## High Performance Intelligent Fax Boards for Microsoft Shared Fax

*Cantata Technology™, Brooktrout® analog fax boards have been certified for use with Microsoft® Shared Fax. Using Brooktrout fax platforms with Microsoft Shared Fax enables you to leverage the fax software included with the Microsoft® Windows® Server and XP Professional family of operating systems and turn your system into a high-performance network fax solution— no extra software needed. This winning combination allows you to easily and inexpensively set up a reliable and secure fax server so employees can confidentially and securely send faxes directly from their desktop and eliminate the costs, complications and lost time associated with walk-up, stand-alone fax machines.*

### Features & Benefits

#### **Extend Your Server's Capabilities**

Microsoft Windows Server and Windows XP Professional family of operating systems include an efficient, manageable, an integrated fax server application called Microsoft Shared Fax. Use the Brooktrout intelligent fax boards to enhance the performance, reliability and security of Microsoft Shared Fax versus class 1 or class 2 fax modems.

#### **Up and Running in No Time**

The Brooktrout fax boards support Windows Plug and Play. Once installed, users can send faxes reliably and directly from their PCs, as easily as they send e-mail. Because the analog loop start versions of Brooktrout intelligent fax boards are certified by Microsoft for use with Microsoft Shared Fax, you have added peace of mind that your network fax solution will work right the first time.

#### **Reliable Faxing All of the Time**

Unlike fax modems that are prone to "hanging", incomplete transmissions, and failed connect attempts that cost you money, the analog loop start versions of the Brooktrout intelligent fax boards deliver proven reliability and availability. Large and small enterprises have put their trust in Brooktrout intelligent fax boards for over two decades. Now, with Microsoft Shared Fax you can realize the benefits of Cantata's experience and reliability.

#### **Secure**

The Brooktrout intelligent fax boards are designed for fax-only applications. Unlike dual purpose fax and data modems, Cantata has taken care to eliminate the security risk and vulnerability to network intrusion that multi-purpose voice-fax-modems and telephony adapters expose.

#### **High Quality and High Performance Transmissions**

The Brooktrout fax platforms have Adaptive Call Progress, a built-in library of communication algorithms that identify and adapt to various fax machines and line conditions. This feature helps achieve unparalleled levels of compatibility, the highest rates of connectivity and the highest transmission speeds across the widest range of fax machines and telephone line conditions.

# Brooktrout Fax Platforms for Microsoft Shared Fax

## Specifications

### OS SUPPORT

- Windows XP Professional
- Windows Server 2003 Family
- Windows Server 2000
- Windows Small Business Server 2000

### PLUG AND PLAY INSTALLATION

Windows PnP compatible device driver software included with Microsoft Shared Fax compatible Brooktrout fax boards.

### SCALABILITY

Brooktrout fax platforms for Microsoft Shared Fax are scalable from 1 to 8 channels per board and up to 4 boards per server\*.

The Brooktrout fax platforms follow the scalability limitations specified by Microsoft. For more information regarding OS fax channel scalability visit: <http://support.microsoft.com/kb/555403>

### ENVIRONMENTAL COMPLIANCE

This electronic equipment complies with the European Union Restriction of the Use of Certain Hazardous Substances in Electrical and Electronic Equipment, Directive 2002/95/EC (RoHS).

### MODELS/CONFIGURATIONS

- TruFax 100 PCI-R MSF, 1 Channel Analog Loop Start, PCI, RoHS Compliant, v.17 (14.4Kps), MH, MR
- TruFax 100 PCI-R UK MSF, 1 Channel PCI Analog Loop Start, Approved for UK RoHS Compliant, v.17 (14.4Kps), MH, MR
- TruFax 200 PCI-R MSF, 2 Channels Analog Loop Start, PCI, RoHS Compliant, v.17 (14.4Kps), MH, MR
- TruFax 200 PCI-R UK MSF, 2 Channels Analog Loop Start, PCI, Approved for UK, RoHS Compliant, v.17 (14.4Kps), MH, MR
- TR1034+P2-2L-R MSF, 2 Channels Analog Loop Start, PCI, RoHS Compliant, v.34 (33.6Kps), MH, MR, MMR, ECM
- TR1034+P2-2L-R UK MSF, 2 Channels Analog Loop Start, PCI, Approved for UK, RoHS Compliant, v.34 (33.6Kps), MH, MR, MMR, ECM
- TR1034+P2-2L-R ZA/NZ/HK/SG MSF, 2 Channels Analog Loop Start, PCI, International, RoHS Compliant, v.34 (33.6Kps), MH, MR, MMR, ECM
- TR1034+P4-4L-R, 4 Channels Analog Loop Start, PCI RoHS Compliant, v.34 (33.6Kps), MH, MR, MMR, ECM
- TR1034+P4-4L-R UK MSF, 4 Channels Analog Loop Start, PCI, Approved for UK, RoHS Compliant, v.34 (33.6Kps), MH, MR, MMR, ECM
- TR1034+P4-4L-R ZA/NZ/HK/SG/ID MSF, 4 Channels Analog Loop Start, PCI, International, RoHS Compliant, v.34 (33.6Kps), MH, MR, MMR, ECM
- TR1034+P8-8L-R MSF, 8 Channels Analog Loop Start, PCI, RoHS Compliant, v.34 (33.6Kps), MH, MR, MMR, ECM
- TR1034+P8-8L-R ZA/NZ/HK MSF, 8 Channels Analog Loop Start, PCI, International, RoHS Compliant, v.34 (33.6Kps), MH, MR, MMR, ECM
- TR1034+P8-8L-R UK MSF, 8 Channels Analog Loop Start, PCI, Approved for UK, RoHS Compliant, v.34 (33.6Kps), MH, MR, MMR, ECM

\* TruFax is not compatible with a TR1034 board in the same chassis.
